KYOCERA exhibited Fine Ceramic Components at Germany's Hannover Messe

The company showcased industrial fine ceramic innovations for a wide range of applications including electronics, automotive systems, and machinery

Kyoto/London – May 7th, 2018. Kyocera exhibited its latest products and technologies at [Hannover Messe 2018](http://www.hannovermesse.de), the world's leading tradeshow for industrial technology. It took place from April 23 through to April 28 at Germany's Hannover Exhibition Grounds. Kyocera had expanded its exhibit booth this year with a broader range of products and technologies, featuring diverse innovations used in a wider range of applications as compared to its inaugural appearance at Hannover Messe last year.

As a world leader in fine ceramics, Kyocera displayed advanced materials and components in eight industrial categories: life sciences, vacuum components, semiconductors, electronics, sapphire, information technology, machinery, and automotive. In reflection of the show's theme, "Integrated Industry — Connect & Collaborate," Kyocera displayed products that support new industrial trends and solutions such as semiconductor processing equipment components, laminated substrates for power modules, and other innovations.

Fine Ceramic Components

Kyocera offers advanced ceramic materials in approximately 200 different formulations — including Aluminum Oxide, Aluminum Nitride, Cermet, Cordierite, Forsterite, Mullite Sapphire, Silicon Carbide, Silicon Nitride, Steatite, Ytria and Zirconia. The company has also developed a wide range of process technologies of its own that can be incorporated into dry-pressing, cold-isostatic pressing, hot-isostatic pressing, injection molding, tape casting, multilayering and metallizing ceramics.

Kyocera Booth Outline

Exhibition	Hannover Messe 2018 http://www.hannovermesse.de/home
Date	Monday, April 23 – Friday, April 27, 2018
Location	Hannover Exhibition Grounds, Germany, Hall 5, Stand A21 http://www.hannovermesse.de/exhibitor/kyocera-fineceramics/Y959297

About KYOCERA

Headquartered in Kyoto, Japan, Kyocera Corporation is one of the world's leading manufacturers of fine ceramic components for the technology industry. The strategically important divisions in the Kyocera Group, which is comprised of 264 subsidiaries (as of March 31, 2018), are information and communications technologies, products which increase quality of life, and environmentally friendly products. The technology group is also one of the oldest producers of solar energy systems worldwide, with more than 40 years of experience in the industry.

The company is ranked #522 on Forbes magazine's 2017 "Global 2000" listing of the world's largest publicly traded companies. With a global workforce of over 75,000 employees, Kyocera posted net sales of approximately €12.04 billion in fiscal year 2017/2018. The products marketed by the company in Europe include printers, digital copying systems, microelectronic components, and fine ceramic products. The Kyocera Group has two independent companies in the United Kingdom: Kyocera Fineceramics Ltd. and Kyocera Document Solutions.

The company also takes an active interest in cultural affairs. The Kyoto Prize, a prominent international award, is presented each year by the Inamori Foundation — established by Kyocera founder Dr. Kazuo Inamori — to individuals and groups worldwide who have contributed significantly to the scientific, cultural, and spiritual betterment of humankind (converted at approximately €764,000 per prize category).
